**SKEENA RESOURCES LIMITED**  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
SEPTEMBER 30, 2006

---

**1. NATURE AND CONTINUANCE OF OPERATIONS**

The Company operates primarily in the mining industry. The Company is in the exploration stage with respect to its mineral property interests and has not, as yet, achieved any commercial production.

These financial statements are prepared in accordance with Canadian generally accepted accounting principles with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. The recoverability of the amounts shown for mineral property interests is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete exploration and development of the properties, the timing of legislative or regulatory developments relating to environmental protection, and upon future profitable operations or proceeds from the disposition thereof.

	September 30 2006	December 31 2005
Working capital	\$ 687,250	\$ 210,779
Deficit	(8,599,074)	(8,016,718)

**2. SIGNIFICANT ACCOUNTING POLICIES**

**Principles of consolidation**

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary. Significant inter-company transactions and balances have been eliminated on consolidation.

**Use of estimates**

The preparation of consolidated financial statements in accordance with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the period. Actual results could differ from these estimates.

**Marketable securities**

Marketable securities are recorded at the lower of cost or market value.

Realized gains or losses on sale of marketable securities are determined based on the specific cost basis.

**2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)**

**Mineral property interests**

All costs related to the acquisition, exploration and development of mineral property interests are capitalized by property. If economically recoverable ore reserves are developed, capitalized costs are reclassified as mining assets and amortized using the unit of production method. When a property is abandoned, all related costs are written off to operations. If, after management review, it is determined that the carrying amount of a mineral property is impaired, that property is written down to its estimated net realizable value. A mineral property is reviewed for impairment whenever events or changes in circumstances indicate that its carrying amount may not be recoverable.

The amounts shown for mineral properties do not necessarily represent present or future values. Their recoverability is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

**Asset retirement obligations**

Asset retirement obligations are legal obligations associated with the retirement of tangible long-lived assets that the Company is required to settle. The Company recognizes the fair value of liabilities for asset retirement obligations in the period in which they occur or in the period in which a reasonable estimate of such costs can be made. Liabilities include those liabilities related to environmental protection and rehabilitation due to environmental law or contracts. The asset retirement obligation is recorded as a liability with a corresponding increase to the carrying amount of the related long-lived asset.

**Equipment**

Equipment is recorded at cost less accumulated amortization. Amortization is recorded on a declining balance basis at the following annual rates:

Computer equipment	30%
Telephone equipment	20%
Field equipment	20%
Furniture	20%
Computer software	100%

**Foreign currency translation**

The Company's subsidiary is an integrated foreign operation and is translated into Canadian dollars using the temporal method. Monetary items are translated at the exchange rate in effect at the balance sheet date and non-monetary items are translated at historical exchange rates. Income and expense items are translated at rates approximating those in effect at the time of the transactions. Translation gains and losses are reflected in the statement of operations for the year.

**Stock-based compensation**

The Company uses the fair value method whereby the Company recognizes compensation costs for the granting of all stock options and direct awards of stock. Any consideration paid by the option holders to purchase shares is credited to capital stock.

**SKEENA RESOURCES LIMITED**  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

---

**2. SIGNIFICANT ACCOUNTING POLICIES** (cont'd...)

**Loss per share**

The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method, the dilutive effect on loss per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the year. For the years presented, this calculation proved to be anti-dilutive.

Basic loss per share is calculated using the weighted average number of common shares outstanding during the year.

**3. MARKETABLE SECURITIES**

**4. MINERAL PROPERTY INTERESTS (cont'd...)**

**Title to mineral properties**

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties is in good standing.

*British Columbia Claims*

**Ice Claims Project, Elk Valley, British Columbia**

The Company entered into an option agreement to earn a 75% interest in the Ice Claims Project located in Elk Valley, British Columbia pursuant to which the Company paid \$50,000 and issued 100,000 common shares at a value of \$8,000. The Company also issued 25,000 common shares at a value of \$2,000 for finder's fees and paid \$30,000 and issued 200,000 common shares at a value of \$40,000 pursuant to extension and amending agreements.

During fiscal 2005, the Company returned the claims to the vendor and wrote off \$411,976 of capitalized costs attributed to this project.

**Ronoke and Blackhorn Claims, British Columbia**

The Company entered into an option agreement to earn a 100% interest in certain claims in the Clinton and Nelson mining districts of British Columbia pursuant to which the Company paid \$5,000 and issued 150,000 common shares at a value of \$27,000. To earn its interest, the Company was required to make additional staged payments of \$25,000 and 400,000 common shares.

The claims were subject to a 2% net smelter returns ("NSR") royalty, to which the Company retained the right to purchase for a payment of \$500,000.

The title dispute was resolved in favour of the Company's vendor. Pursuant to an agreement with the vendor to remove the NSR and acquire 100% of the interest in both the Blackhorn and Ronoke claims, the Company paid \$10,000 and issued 200,000 common shares at a value of \$82,000 in lieu of the staged payments of \$25,000 and 400,000 common shares and the work commitments.

The Ronoke property is under option to a private British Columbia corporation attempting to obtain a public stock exchange listing and has assigned its option rights and obligations to the new company. Option payments of \$5,500 have been paid with a further commitment to receive common shares from the public company valued at \$20,000 once it is publicly traded. In addition, a deficient option payment due June 30, 2006 will be satisfied by the new company upon its public listing by an undertaking to issue 82,500 shares at a deemed value of \$0.10 per share.

**SEPTEMBER 30, 2006**

**4. MINERAL PROPERTY INTERESTS (cont'd...)**

**El Corazon Property, Ecuador**

The Company entered into an agreement with Alpha Oil Inc. ("Alpha") to acquire Alpha's option with Compañía Agroindustrial El Corazon S.A. ("Agroindustrial") to earn a 50% interest in the El Corazon property located in the Province of Imbabura, Ecuador. A private Ecuador company (ALPHEC Alpha Ecuador S.A.), holding the option as its sole asset, was acquired from Alpha in consideration for the reimbursement of certain expenses and the issuance of 5 million common shares valued at \$1,750,000. To earn its interest, the Company is required to advance a payment of \$1,500,000 in cash or common shares, at the election of the Company, on or before December 11, 2008. The Company paid Agroindustrial US\$365,000 in option payments and is required to make additional staged cash payments before December 11, 2008, of US\$4,100,000 and incur a minimum of US\$5,000,000 in exploration expenditures.

The Company's Agreements with AgroIndustrial and Alpha Oil are as follows:

**7. CAPITAL STOCK AND CONTRIBUTED SURPLUS (cont'd)**

**Private placements**

On June 16 and July 7, 2006, the Company closed 2 tranches respectively, of a non-brokered private placement and issued 5,048,000 units at \$0.25 per unit for proceeds of \$1,262,000. Each unit consisted of one common share and one half share of a share purchase warrant. Each full warrant entitles the holder to acquire one additional common share at \$0.40 for a period of 18 months. In the event the closing price of the Company's common shares is at least \$0.60 per share for a period of twenty consecutive trading days, the Company may terminate any unexercised warrants on twenty-five days notice. The Company paid finders' fees and other issuance costs of \$59,202 and issued 236,810 agents' warrants exercisable at \$0.50 for a period of one year.

During fiscal 2005, the Company issued 3,812,500 units at \$0.40 per unit for proceeds of \$1,525,000. Each unit consisted of one common share and one share purchase warrant entitling the holder to acquire one additional common share at \$0.75 for a period of two years. In the event the closing price of the Company's common shares is at least \$1.00 per share for a period of ten consecutive trading days, the Company may terminate any unexercised warrants on thirty days notice. The Company paid finders' fees and other issuance cost of \$85,004 and 288,300 agent's warrants valued at \$17,591 exercisable at \$0.55 for a period of one year.

**Commitment to issue shares**

During fiscal 2005, in accordance with the agreement with Alpha, the Company committed to a final issuance of 2,500,000 common shares on the anniversary date of December 11, 2005, subject to regulatory approval. The commitment to issue the 2,500,000 common shares was provided for at a value of \$0.24 per share for a total of \$600,000; the shares were issued April 21, 2006.
